November 18, 2026

Dear Parents and Guardians,

As you and your student begin planning for their transition to high school, we want to provide you with an additional resource to help guide conversations about course selections for 9th grade.

We understand that choosing high school courses can feel overwhelming, especially when navigating the different academic pathways, course levels, and elective opportunities available. To help make this process easier, we have created an additional resource that provides information about course options and helps families make informed decisions about the classes that will best support their student's interests, strengths, and future goals.

We encourage you to review this resource with your student as you begin considering their 9th grade schedule. It is intended to serve as a supplemental guide alongside the course guide.

Our goal is to ensure that every student has a schedule that provides opportunities for growth, challenge, and exploration as they begin their high school experience.

Please reach out if you have questions or need additional guidance as you navigate the course selection process.

We look forward to welcoming your student to Ridgewood High School!

Sincerely,

Katie Davis
Ridgewood High School
Division Head of Student Services and Career Pathways
